

# Privacy 101

This blog post provides a 2-minute high level overview of Privacy issues to entrepreneurs. Privacy is closely related to IT & Security infrastructure. It has three main aspects: (i) compliance; (ii) data breach and (iii) litigation.

Compliance is related to putting in place your privacy policies, website terms of use, cookie polices, and vendor and/or partner agreements. If you suspect that a data breach occurred at your company, than a few laws are triggered that a privacy attorney can help you navigate. If your privacy is breached or your terms in an agreement or contract were violated, dispute and/or litigation including any class-action litigation will help you.

## PRIVACY — CLOSELY RELATED TO IT & SECURITY (COMPLIANCE, BREACH AND LITIGATION)
